1   installation guide

Install the plugin via the plugin module and make the desired settings in the plugin configuration of digi1Moretabsforproductdetailpage.

2   possible content elements within the own tabs

The following content elements are possible within the own tabs:

- normal text

- images

- links

- HTML elements

- headlines (h1, h2, h3, h4, h5 and h6)

3   fill the own tabs via the snippet module for the same content in the tab for all products

It is also possible to fill the content of a tab, which should be the same for all products (for example shipping information), with the option "**fill tab 1 via a snippet**" (this is possible for every tab). In this case you can fill the tab via a snippet without having to deposit the same content for all products and to handle all products if changes are made.

The snippets would be:

- **tab 1 headline:** tab1HeadlineFillviasnippet

- **tab 1 content:** tab1ContentFillviasnippet

- **tab 2 headline:** tab2HeadlineFillviasnippet

- **tab 2 content:** tab2ContentFillviasnippet

- **tab 3 headline:** tab3HeadlineFillviasnippet

- **tab 3 content:** tab3ContentFillviasnippet

- **tab 4 headline:** tab4HeadlineFillviasnippet

- **tab 4 content:** tab4ContentFillviasnippet

- **tab 5 headline:** tab5HeadlineFillviasnippet und

- **tab 5 content:** tab5ContentFillviasnippet.
